(54) Title: INTERACTIVE NETWORK GUIDE WITH PARENTAL MONITORING

(57) Abstract: Interactive network guide with parental monitoring in a networked multi-room system. The networked multi-room system is made up of one primary device and one or more remote devices where the primary device includes an indication of status of at least one of the remote devices. For example, a user of the primary device can choose to receive a display of status change each time one of the remote devices toggles between on, off, changes to a different channel, or presents a recorded program from the primary device. The user also has the option of creating a PIP view on a display device coupled to the primary device showing the current tuned signal being displayed by one of the remote devices.
